

gramlot

A complete set of graphic assets

Vector masters. Transparent exports. Icons. Social compositions.

Approved September identity; vector reconstruction for visual review.

The identity, in every layout

One shared geometry; original outlined Arial Rounded MT Bold lettering.

gramlot

STACKED LOGO

Keep at least one disc diameter of clear space around the artwork.

SVG: use at any output resolution.
PNG: width is stated in the filename.

gramlot

HORIZONTAL LOGO

gramlot

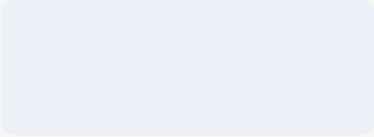

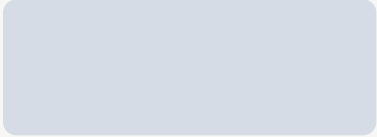

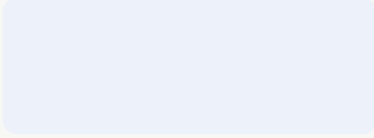

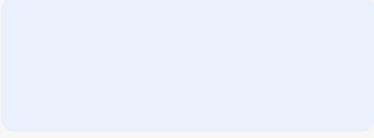

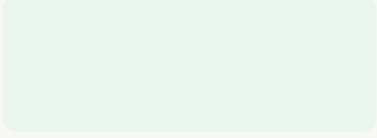

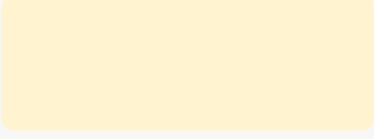

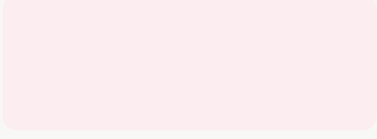

WORDMARK

SYMBOL / MONOCHROME UTILITY

Color and small-scale use

Brand colors plus the approved supporting application palette.

			
brand.blue #456BC4	brand.yellow #FFC400	ink #243449	background #F7F8F5
			
surface #FFFFFF	surface.subtle #EDF1F7	text.secondary #566579	border #D5DCE5
			
border.control #7A8798	navigation #182333	navigation.text #EDF2FA	action #456BC4
			
action.hover #3557AB	selected #EAF0FC	success #23745B	success.background #EAF5EF
			
warning #785000	warning.background #FFF4CF	error #B13D48	error.background #FCEEF0

Browser icons at 16, 24, 32, 48 and 64 pixels

				
16px	24px	32px	48px	64px

Thin tips need a check
in the target browser.

A practical handoff

Choose an export, preserve the identity and check the target surface.

01 / Choosing files

svg/: transparent logo, horizontal, symbol and wordmark in six variants.

png/: transparent RGB raster exports from 64px to 2048px width.

icons/: browser, Apple touch, Android and maskable icon exports.

social/: open graph, square, banner, portrait and story compositions.

backgrounds/: light/dark wallpapers and presentation backgrounds.

02 / Consistent use

Use primary artwork on light surfaces, inverse on navy.

Preserve proportions, orientation, lowercase lettering and colors.

Leave at least one disc diameter around visible artwork.

Start with a 64px symbol or 160px full logo; inspect the actual size.

Monochrome files support one-color reproduction, not semantic states.

03 / Production and provenance

The source/master SVG contains paths only, with no font dependency.

The symbol is reconstructed from the selected September raster reference.

New vector artwork and compositions remain subject to owner visual review.

PDF and PNG exports use RGB; agree CMYK with the printer for press work.

No font files are redistributed. Historic raster references are preserved.

04 / Rebuild and integrate

source/README.md documents export dependencies and the rebuild command.

manifest.json records dimensions, format, byte count and SHA-256 hashes.

icons/README.md provides favicon and webmanifest integration snippets.

The kit includes graphic assets; it does not install a runtime theme.
